Dhairy Raval

902-403-8689 | dhairyraval@gmail.com | linkedin.com/in/dhairy-raval | github.com/dhairyraval

Technical Skills

Languages: Java, Python, C/C++, SQL, JavaScript, HTML/CSS, Kotlin
Frameworks: React, Node.js, Flask, JUnit, Espresso, WordPress, REST
Cybersecurity Tools: Nmap, Wireshark, Metasploit, Nessus, Firewall Config, Vulnerability Analysis
Developer Tools: Git, Docker, AWS, GCP, Nano, Wireshark, Linux, VirtualBox
Certifications: CompTIA Security+, Network Security certificate (Dalhousie)

Education

Dalhousie University Halifax, NS
Bachelor of Computer Science – CGPA: 3.95 *Sep 2019 – May 2023*

- Graduated with the Sexton Scholar Distinction

Work Experience

Live Data Production Supervisor Aug 2022 - Present
Nielsen *Halifax, NS*

- Supervised data integrity and real-time updates, ensuring the accuracy of data pipelines for live sports reporting.
- Improved key workflows through process optimization and quality control, enhancing data integrity and accuracy.
- Facilitated the onboarding process and provided ongoing training and assistance to Live Data Operators, resolving queries, and maintaining smooth operations.

Risk Assessment Intern April 2024 - July 2024
Arista Solutions *Mumbai, India*

- Performed vulnerability assessments on physical and network security measures such as access control, web application testing, and perimeter controls
- Assisted in creating comprehensive security strategies, risk analysis reports, CONOPS, SOPs, and technical documentation
- Researched emerging security technologies, and tested new security technologies using tools like VirtualBox, sn1per, and Nessus

Projects

Network Gateway Manipulation Attack | *Network Security, IP Routing, NAT, Packet Analysis, Threat Sim.* Jan 2025

- Simulated an on-path attack using a Raspberry Pi, setting up NAT and IP forwarding in a controlled environment.
- Using Wireshark for network capture and packet analysis
- Highlighting secure protocols and best practices to mitigate network vulnerabilities.
- Demo , Project Document

Travel Router + VPN Adblocker | *Raspberry Pi5, PiVPN, Flask, SSH, Cron Jobs* Nov 2024

- Deployed a custom travel router providing secure internet access for multiple devices over public Wi-Fi networks
- Integrated VPN support + Ad-Blocking on the Raspberry Pi (Router) for encrypted browsing and enhancing UX
- Developed a Flask-based captive portal for easy Wi-Fi network selection and authentication

Face Recognition & Notification System | *Lambda, Step Function, S3, API Gateway, Rekognition, SNS* May 2023

- Deployed a Serverless application on AWS to verify user identities and send email logs to administrators
- Utilized AWS Lambda Functions & Rekognition for processing of user inputs and image analysis
- Demo , Source Code

Hired-Swipe | *Kotlin, Jetpack Compose, Git, Firebase User Auth* March 2022

- Gamified the job application process to enhance user engagement and efficiency
- Designed and developed a Tinder-inspired homepage with Nested RecyclerViews and Swipe Gestures
- Demo, Source Code
